## Work Experience

---

### Codec Technologies

|                                                                                                                                                                                                                                                |                                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| <i>Machine Learning Engineer Intern</i>                                                                                                                                                                                                        | <i>Kolkata, WB (Jan'26 - Feb'26)</i> |
| <ul style="list-style-type: none"><li>Developed an end-to-end Customer Churn Prediction model using Python and Scikit-learn, achieving 87% accuracy through data preprocessing, feature engineering, model training, and evaluation.</li></ul> |                                      |

### Consistent Services

|                                                                                                                                                                                                                                                                                                                                                                                          |                                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| <i>Software Engineer Intern</i>                                                                                                                                                                                                                                                                                                                                                          | <i>Kolkata, WB (Mar'26 - May'26)</i> |
| <ul style="list-style-type: none"><li>Developing an interactive 3D WAP-7 locomotive visualization system using Unity/Unreal Engine, simulating traction, braking, auxiliary and pneumatic systems with real-time animations, selectable components and exploded views, while integrating bilingual audio-visual training modules and adhering to RDSO/CLW technical standards.</li></ul> |                                      |

### Allotrope Systems Private Limited

|                                                                                                                                                                                                                                                                                                                                                                    |                                      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| <i>Backend Engineer Intern</i>                                                                                                                                                                                                                                                                                                                                     | <i>Kolkata, WB (Jul'25 - Oct'25)</i> |
| <ul style="list-style-type: none"><li>Developed a Hospital Management System backend using Node.js, Express.js, and MongoDB, implementing REST APIs and Mongoose schemas for core workflows (appointments, billing, beds, discharge), while applying MVC architecture, async/await, and centralized error handling for scalable and maintainable design.</li></ul> |                                      |

## Projects

---

### Facial Recognition System (Python, OpenCV, CVzone) GitHub

- Developed a real-time facial-recognition attendance system using Python, OpenCV, and face recognition, leveraging pre-trained embedding models for identity matching and engineering a reliable check-in workflow for automated attendance logging and reporting.

### Personal AI Assistant for Recruiter Screening (Python, LangChain, FAISS, Groq) GitHub | Deployed Link

- Built and deployed a public RAG-based AI assistant that answers recruiter questions about my CV instantly and accurately — reducing back-and-forth for recruiters while saving me time on repetitive screening questions. Uses FAISS + Sentence Transformer embeddings for retrieval and Groq (via LangChain) for grounded, first-person response generation.

### AWS Data Pipeline (AWS S3, Lambda, Glue, EventBridge, SNS, CloudWatch, Python) GitHub

- Developed a Python-based serverless ETL pipeline using AWS Glue and AWS Lambda to ingest, clean, and transform raw CSV data into analytics-ready outputs, implemented modular workflow components for maintainability and faster iteration, and improved data quality while reducing manual preprocessing effort.

## Technical Skills

---

**Languages:** Python, SQL, Java

**Frameworks/Libraries:** Scikit-Learn, Pandas, OpenCV, YOLO, Matplotlib, LangChain, TensorFlow, Express.js, FastAPI

**Areas:** Computer Vision, NLP, RAG Pipelines, LLM, Generative AI

**Tools:** Git, GitHub, AWS, VectorDB, Postman, Ollama, Mistral, Gemini API

### Certifications & Achievements

---

**AMCAT (2025):** Automata 93/100, Advanced Quant 84/100, Programming 79/100 — AWS Cloud Practitioner (GFG) — LangChain: Foundations (LangChain Academy) — Intro to Modern AI (Cisco) — Intro to Python (Nasscom)
